PROFESSIONAL SUMMARY

Cloud and Systems Engineering professional with experience designing, deploying, and managing scalable AWS and Azure infrastructure. Skilled in CI/CD automation, Docker, and Infrastructure as Code (Terraform), with expertise in Linux/Unix. Certified in AWS, Azure, and networking (CCNA/CCNP), focused on performance optimization, high availability, and security.

EDUCATION

Arizona State University

Aug 2024 – May 2026

Master of Science in Information Technology, GPA: 4.0/4.0

Tempe, AZ

Coursework: Advanced System Security, Database Management Systems (DBMS), Big Data Analytics, Data Visualization

P P Savani University

Jul 2020 – May 2024

Bachelor of Technology in Computer Engineering

Surat, Gujarat

Coursework: DBMS, Computer Network, Cloud Computing, Programming with python, Advance Java, Artificial Intelligence

SKILLS

Cloud Technologies: AWS (EC2, S3, Lambda, CloudWatch, IAM, API Gateway), Azure

DevOps & Automation: CI/CD (Jenkins, GitHub Actions), Docker, Kubernetes, Git, Infrastructure as Code (Terraform)

Programming Scripting: Python, Java, Bash, HTML/CSS, C

Systems & Networking: Linux/Unix Administration, Windows Server, Apache, MySQL, TCP/IP, DNS, VPNs, Firewalls

Cybersecurity & Monitoring: Threat Analysis, Vulnerability Management, Splunk, Nessus, Metasploit, OWASP

Certifications: AWS Certified Cloud Practitioner, Azure Developer Associate, CCNA, CCNP

EXPERIENCE

Essential Employment Service

Jan 2026 – Current

IT Security Engineer

Tempe, US

- Administer first-level technical support and user account management using ticketing tools and secure protocols.
- Monitor network performance and system health via remote tools to proactively report and resolve issues
- Collaborate with senior IT staff to implement security practices, document procedures, and optimize workflows.

Dreamscape Learn

May 2025 – Jan 2026

Pod Operator

Tempe, US

- Operated and maintained 50+ immersive AR/VR systems using Unity, Linux, and hardware diagnostics tools.
- Delivered hands-on technical support to 300+ students, VIPs, and faculty, resolving device, sensor, and software issues.
- Streamlined readiness with SOPs and Jira workflows, minimizing delays and improving session efficiency by 30%.
- Ensured equipment hygiene, calibration, and uptime through structured daily inspections and reporting logs.

AppWorld Infotech

Dec 2023 – May 2024

Cloud Administrator

Surat, Gujarat

- Built CI/CD pipelines with Jenkins/GitHub and automated IaC with Terraform/Docker, improving deployments.
- Maintained 99.9% uptime for Linux production environments (Apache/MySQL) and optimized performance.
- Configured AWS CloudWatch monitoring and alerts, reducing troubleshooting time.

P P Savani University

June 2022 – May 2023

Network Administrator

Surat, Gujarat

- Optimized Cisco configurations and routing protocols, improving network uptime and overall system performance.
- Provided Tier 2/3 support, resolving complex connectivity issues for 500+ users using Wireshark and system logs.
- Enhanced network security via firewall policies, site-to-site VPNs, and VLAN segmentation to protect traffic.

PROJECTS & LEADERSHIP

AI-Powered Cloud Defense for Threat Detection [\[Report\]](#)

Jan 2024 – Feb 2024

- Developed an AI-driven cybersecurity framework using CNNs and RNNs for cloud-based anomaly detection, malware classification, insider threat detection, and phishing mitigation, which improved detection accuracy and reduced manual triage time. Additionally, implemented interpretable AI ensembles and automated incident response workflows using NLP and deep learning, thereby accelerating real-time threat containment and enhancing resilience against zero-day attacks.

AWS Chatbot with NLP | *AWS Lex, Lambda, Python*

Dec 2023 – Jan 2024

- Automated 80% of queries via AWS Lex NLP, boosting IVR 20% & cutting workload 17% with routing.
- Engineered serverless backend (Lambda/Python) & CI/CD, improving accuracy 22% & satisfaction.

URL Safety Inspector [\[View\]](#) | *Personal Project*

- Developed a Flask web app to detect phishing URLs and emails using machine learning, NLP, and feature engineering.
- Trained models with scikit-learn on phishing datasets, achieving detection accuracy, classification, and preprocessing.
- Implemented real-time URL analysis with a user-friendly interface, API integration, and automated threat reporting.

CERTIFICATE

- AWS Certified Cloud Practitioner
- Microsoft Certified: Azure Developer Associate
- Cyber Security Awareness Award
- Cisco Certified Network Associate (CCNA) & Cisco Certified Network Professional (CCNP)
